

# Who we are

We are a Czech company known and appreciated beyond the borders of the country for its accessibility, creativity and adherence to ethical business rules. The company was founded in 1992 and soon gained a reputation for professional, reliable and fast supplier of a wide range of drive products including comprehensive service. We are based in Brno, not far from the famous Austerlitz site in easily accessible northern part of Brno on the street Selská in the Maloměřice district.

# our Vision

We believe that people are the most important part of our work. We mean our customers first and foremost, but also suppliers and collaborators. A satisfied customer is a goal that is achieved through the teamwork of employees and suppliers. In this natural sequence of shared goals, we then jointly capitalise on the benefits and successes that make us an attractive partner for our customers.

# Our Mission

The products we supply are mainly from the field of mechatronics, through which we try to contribute to the development of not only the final products of our customers, but also people with their emotions and desires. Through our hard work we want to raise the standards of quality, safety and respect for the environment.

It depicts the letter "e" (as Engineering) placed in a circle with two segments representing the harmonious yet dynamic unification of movements, but also the balance of relationships with suppliers and customers, or a unifying spirit between business and services. Another hidden meaning of the logo is related to with our company slogan "Awakening Dreams". Our new slogan has a double meaning for us. On the one hand, we work every day to create personal career paths for our employees and turn their professional dreams into reality. On the other hand, we design and create our customers' dreams thanks to the expertise and experience of our employees.

# our Staff

In line with our vision, our employees are the cornerstone of the company. We want them to be experts in their field, to have productive and satisfying jobs, and we strive to provide them with perspective, background and stability. We continually invest in their development and professional growth, We enhance their technical skills, independence, problem-solving ability and understanding of customer needs in line with company values. Our strength comes from teamwork, the ability to rely on the skills of our colleagues by making our skills available to all.

# our Quality

## Our QUALITY

We are focused on quality of service and products, and we have clearly defined the company's rules of conduct. We invest in training people, in software and hardware, in state-of-the-art methods and in the assembly and output control of gearboxes. In 1995, we decided to implement ISO 9001 as a tool to define our company procedures. In the same year we received ISO 9001 certification. In 2014, as representatives of Bonfiglioli, we obtained the **BEST** (Bonfiglioli Excellence Service Team) certification, which we in 2020, they have extended the level to "Bronze", which means certification by an independent body, in this case TÜV.

**OPIS Engineering k.s.**  
*Probouzíme sny*

**Etický kodex**

**OPIS Engineering k.s.**

We encourage an ethical role for our society. We maintain contact with educational institutions and create opportunities for young people to develop new experiences and exchange ideas. We are convinced that quality processes enable greater efficiency in the use of company tools, reduce processing times and contribute to the ecological behaviour of society. The official awards we have received convince us that we are heading in the right direction and our business successes, i.e. customer orders, are the reward.

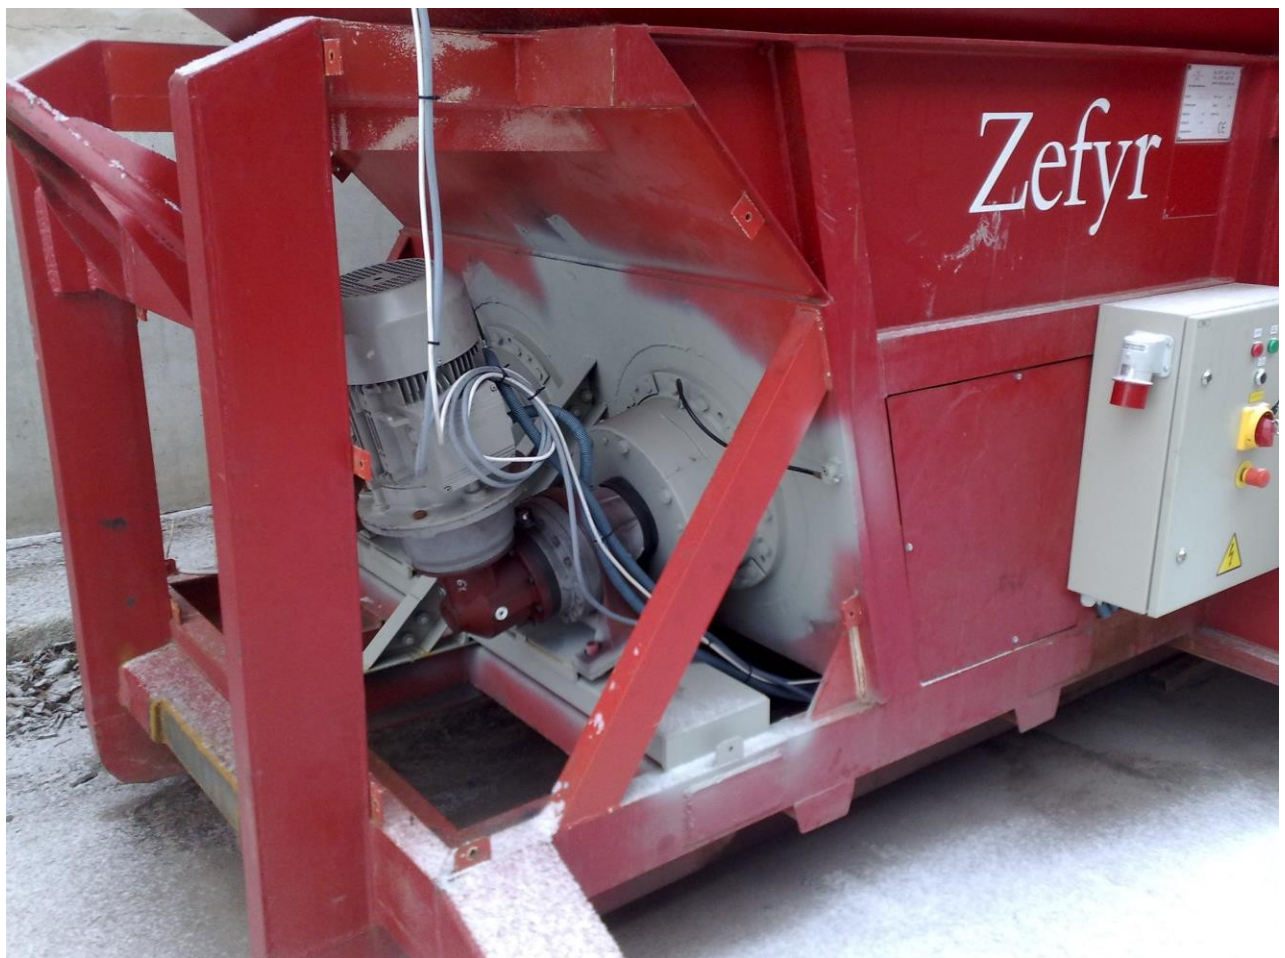

## our Services

We want to be ready, reliable and complete partner. We strive for the highest level of flexibility and technical preparation and we use our years of experience to build relationships with our customers on the basis of business seriousness, loyalty and professionalism.

# our Applications (solutions)

Traditional areas of application of our products and solutions are mainly in the industrial sectors such as transport, packaging and handling equipment, crushing machines, automation parts, mining industry, components for machine tools, textile and agricultural machinery. We have special applications in the field of water flow control, but also in the medical sector, for example.

# MANUFACTURING
