MAGNETIC CORNER TRACKS

Movex Curves

Movex Curves are designed to offer better conveyor performance. Suitable for steel and plastic chains, our curves are produced with computer controlled machines with a smooth chain guide surface.

- Available in different materials and designs:
- Standard UHMW-PE (standard applications)
 - BluLub (limited or no lubrications)
 - RS (high performance)

Movex Curves produced in RS and BluLub materials need less energy and with a lower coefficient of friction, improve product stability and chain wear-life.

These curves are perfectly interchangeable with the standard design.

PROFILES UHMW-PE and *BluLub*
