

40x28mm

V40S Series

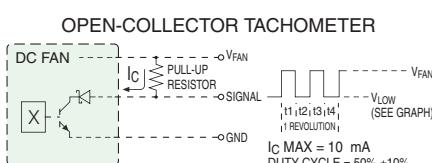

- ✓ Free-Running and Feedback-Governed, Speed-Stable Models
- ✓ Air Delivery to 24 CFM, 1.6 inwg
- ✓ Wide Variety of Monitor and Control Options
- ✓ Open-Flange Housing
- ✓ Permanently Lubricated Dual Ball Bearings

Vane Axial Cooling Fans

Model	Air Flow (CFM)	Max. Static Pressure (inwg)	Operating Voltage Nominal (V)	Operating Range (V)	Operating Current (A)	Input Power (W)	Fan Speed (rpm)	Sound Pressure (dBA)	Operating Temp. Min. (°C)	Operating Temp. Max. (°C)	L10 Life [†] (hours)
Speed-Stable

V40S12BMA5-51	11	0.41	12	7.0-13.8	0.14	1.7	8500	34.5	-10	+70	—

Air flow, current, speed and sound pressure ratings are at nominal operating voltage and zero static pressure. Current and power ratings are average expected values under those conditions. [†]L10 bearing life expectancy at $T_A = +40^\circ\text{C}$. ® UltraFlo is a registered trademark of Nidec Corporation.

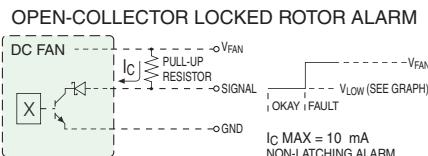

To specify an open-collector tachometer circuit (two square wave pulses per revolution, 50 percent duty cycle) terminated in a third lead wire, change the model name suffix from "01" to "02" or from "51" to "52."

For an open-collector, low-pass/high-fail locked rotor alarm circuit terminated in a third lead wire, change numerals in the model name suffix to "03" or "53."

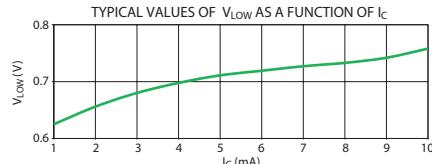

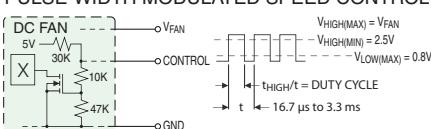

Pulse-width modulated speed control for speed-stable models is designated by the suffix "06." For PWM-controlled, free-running fans, use the suffix "56."

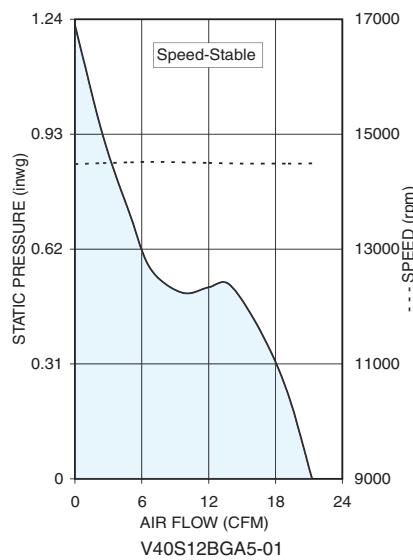

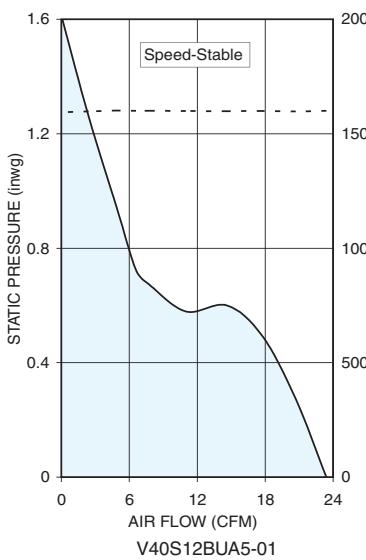

Pulse-width modulated speed control and an open-collector tach are specified by the model name suffix "07" (speed-stable fans) or "57" (free-running fans).

PWM speed control and an open-collector, low-pass/high-fail locked rotor alarm are specified by changing the model name suffix from "01" to "08" or from "51" to "58."

PULSE-WIDTH MODULATED SPEED CONTROL

V40S Series
