

Hygienic SS ProRun

Polished Bearing Supports Series

M  METRIC SIZE

Movex[®]

Hygienic SS ProRun Series

Stainless, sealed.
Superior.

- Polished AISI 304 stainless housing**
 Designed for corrosion resistance and frequent cleaning cycles.
- FDA-compliant bottom seal**
 Prevents fluid ingress from below, ensuring full sealing.
- Open/closed AISI 304 stainless caps**
 Tailored to match hygiene level and accessibility needs.
- FDA-grade radial seals**
 Reliable sealing against dirt, liquids and process contaminants.

The **Hygienic SS ProRun Series** is our most advanced solution for hygienic environments, specifically designed for industries where cleanliness, durability, and process safety are critical. With its fully stainless steel housing, FDA-compliant sealing system, and a design built to withstand aggressive washdowns, this bearing unit ensures maximum protection against contamination, reduced maintenance, and long-lasting reliability.

Ideal for use in food, beverage, pharmaceutical, and cleanroom applications.

Hygienic SS ProRun Series

CLOSED AND OPEN CAP VERSION

- Fully hygienic, corrosion-resistant design
- Zero lubrication points on the housing
- Withstands aggressive washdowns and chemicals
- Smooth surfaces, easy to sanitize
- Compliant with hygienic design principles
- FDA-compliant sealing system

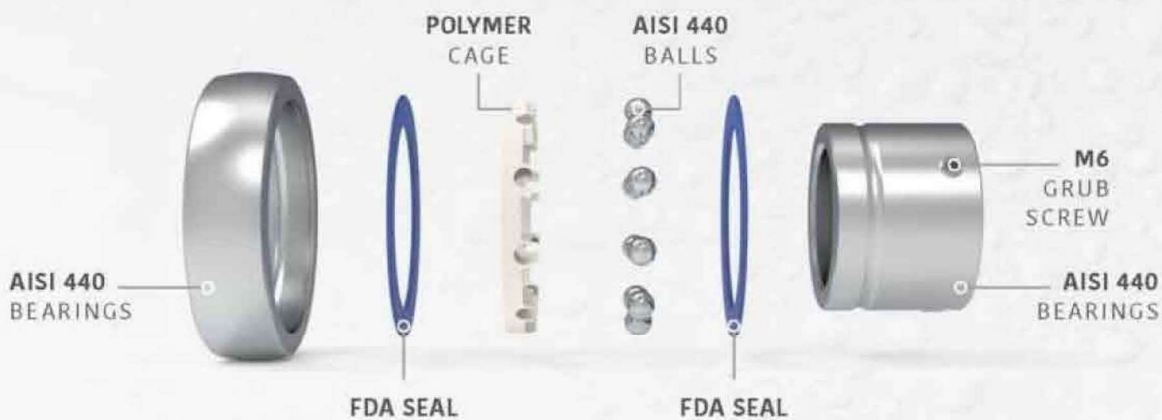

SS ProRun bearing insert

The new benchmark in
hygienic stainless steel
bearing units

Top-tier performance. Zero maintenance.

At the core of the **Hygienic SS ProRun Series** lies our most advanced insert, engineered for high-demand hygienic applications. Constructed with AISI 440 stainless steel rings and balls, a self-lubricating high-performance polymer cage, and filled with FDA-compliant, long-life grease, it delivers exceptional reliability, even under extreme operating conditions.

This insert is permanently sealed, requires **no relubrication**, and ensures smooth performance, making it the ideal choice where uptime, hygiene and durability are non-negotiable.

■ Reinforced polymer cage

Reduces internal friction and eliminates the need for relubrication.

■ AISI 440 stainless steel rings & balls

Exceptional mechanical strength and corrosion resistance.

■ FDA-compliant blue seals & grease

Safe for use in food environments, resistant to washdowns.

Lubricated for life

No re-lubrication required, bearing insert is maintenance-free.

Long-term performance

High performance in harsh, clean environments.

Hygienic design

Fully aligned with modern hygienic bearing design standards.

Enhanced food safety

Perfect sealing, protection from contaminants.

Resource savings

Energy savings and minimal use of water and detergents.

Built to last

Top-quality materials ensure longer life vs. similar products.
